Motion® Tablet PCs are powered by up to the Intel® Core™ i7 vPro™ processor.

Motion Computing® is a leading global provider of tablet PCs and supporting mobility solutions for retail. Rugged, lightweight and highly mobile, Motion Tablet PCs are powerfully equipped and packed with integrated features, maximizing productivity by providing mobile professionals with real-time inventory management and point-of-sale computing. Motion’s innovative products, services and solutions reduce abandonment rates, improve transaction times, speed billing processes and increase overall efficiency. Whether processing payments or capturing signatures, Motion significantly improves retail performance, which translates to an improved customer experience.

Purposely designed for business, Motion solutions are available through a network of value-added resellers and distributors worldwide.
TABLETS ARE INCREASINGLY BEING USED AND EVALUATED FOR USE FOR A VARIETY OF APPLICATIONS IN THE RETAIL SECTOR

For retail and distribution companies, tablets are full-featured, easy-to-carry devices for mobile point-of-sale, inventory management and route sales applications. Effective deployment and management of Motion solutions enable customers to make real time purchase decisions with mobile transaction processing at the point of interaction between the retail employee and their customer.

RESULTS WITH MOTION TABLET PC SOLUTIONS:
- Speed up transaction time at POS to improve throughput
- Increase mobile worker productivity
- Improve real-time decision making
- Build more personal contact with customers
- Check and manage stock levels quickly and conveniently from anywhere
- Deliver high-impact, customized product/service presentations anywhere on the retail floor
- Transact sales anywhere on the retail floor
- Cross-sell and upsell items more efficiently
- Enable B2C engagement processes including mobile Web and e-commerce
- Reduce operating costs
- Enable value-added route sales/merchandising activities

“RETAIL ORGANIZATIONS ARE EXPERIENCING A 28% IMPROVEMENT IN CUSTOMER LOYALTY AND REPEAT BUSINESS AS A RESULT OF WELL DESIGNED MOBILE SOLUTIONS.”
