

Port Replicator

FEATURED SPECS

- USB 2.0 (4)
- Upstream USB 2.0 (1)
- Ethernet
- Video out (DVI)
- DVI to VGA adapter
- 3.5mm audio in
- 3.5mm audio out

BENEFITS

- Full port replication providing added connectivity
- Small footprint
- Plug and Play compatible

Ideal for users in environments with multiple connectivity demands and limited desk or countertop space, the **Port Replicator** transforms the CL910 and CL910 SlateMate into a workstation solution by easily connecting users to multiple devices such as an external monitor, keyboard and mouse. For additional convenience, Port Replicator users can add or remove devices without rebooting the system.

When the Port Replicator is used with a monitor, the connected monitor can be configured to display in either mirror or extended mode.

Motion recommends keeping video playback to a minimum to optimize performance of the CL910 and Port Replicator.
