

J-Series VAD Protective Display Film

PRODUCT

J-Series VAD Protective Display Film

BENEFITS

The J-Series View Anywhere[®] display (VAD) Protective Display Film, provides a durable, hard coat for added display protection, helping to minimize scratches.

- Works with J-Series Tablet PCs with VAD technology
- Ultra-clear film allows up to 99% transmission of light, revealing a bright display with no color distortion
- Removable and replaceable with no residue left behind
- Durable anti-static material helps to prevent the attraction of dust and lint during application

Chemically Resistant to:

MEK, Toluene, Acetone, Cola, IPA, water and insoluble marker.

The Motion Computing[®] J-Series Tablet PC is rugged, powerful and purposely built for field professionals that require a highly mobile device for often harsh work environments.

Built for business with Intel[®] Core vPro[™] technology and running Microsoft[®] Windows[®] 7, the J-Series offers new levels of performance, security and manageability, and it's packed with integrated features that improve in-the-field productivity.

The J-Series VAD Protective Display Film

is an ultra-clear, thin and durable protective film. With a coating designed to reduce reflections and glare, the J-Series VAD Protective Display Film provides a vibrant and sharp display even in brightly lit conditions. The film works with J-Series models equipped with VAD technology, an added layer of protection from everyday scratches. The protective film can be replaced at any time, and its special adhesive will not leave a sticky residue behind when removed.

This high-performance, durable film is recommended for outdoor use, dirty/dusty environments or for applications requiring highly-repetitive pen strokes.

The J-Series VAD Protective Display Film is compatible with the following product:

J-Series with View Anywhere[®] Display

Note: This product is not compatible with J-Series models equipped with Dual Touch or J3400 configurations.
